

No consideration of adverse impacts of investment decisions on sustainability factors

As per Article 12 of Commission Delegated Regulation (EU) 2022/1288, the Company, in its capacity as a 'Financial Market Participant' and 'Financial Adviser' as defined in Regulation, at the moment does not consider principal adverse impacts of investment decisions on sustainability factors as this limits the range of available investments under consideration and thus reduces diversification. The Company may reassess its consideration in the future with regards to the adverse impacts on environmental, social and governance matters. If at any time this change, an amended disclosure shall be made available on our website.
