2. Sustainability risks policy

The Company acknowledges the potential impacts that sustainability risks can impose on the Funds managed and considers the approach to integrate the risks arising from sustainability issues described in this policy.

Before any investment decisions are taken on behalf of the Funds that the Company manages, the Company will have to complete a process for the identification of the material risks associated with each proposed investment, including sustainability risks.

More information on Company's approach to integrate sustainability risks into the investment decision making process (pre-trade assessment) can be found in the Sustainability Risk Policy which has been uploaded separately on the Company's website.

3. No consideration of adverse impacts of investment decisions on sustainability factors

As per Article 12 of Commission Delegated Regulation (EU) 2022/1288, the AIFM, in its capacity as a Financial Market Participant as defined in Regulation, at the moment does not consider principal adverse impacts of investment decisions on sustainability factors as this limits the range of available investments under consideration and thus reduces diversification.

If at any time this changes a disclosure shall be made available on our website.
